DETAILED ACTION

Continued Examination Under 37 CFR 1.114

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 2 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bryant U.S. patent No. 5,040,264.

Bryant clearly teaches a porous substrate in the form of a card impregnated with with an agent such as an essential oil. The card is used with a vacuum cleaner and is capable of being cut into strips. See the abstract, column 2, lines 44-55 and column 3, lines 48-68.

Claim 2 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bosses U.S. patent No. 5,342,420.

Bosses teaches means to deodorize a vacuum cleaner including a porous substrate in the form of a card or strip impregnated with an active agent including essential oils. The substrate is capable of being cut into strips. See the abstract, column 3, lines 25-68.

Claim 2 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Colon U.S. patent No. 5,460,787.

Colon teaches a card impregnated with an active agent such as a fragrance for use in deodorizing areas by attachment to air moving means. The card is capable of

being cut into strips and capable of being used with a vacuum cleaner. See the abstract and the figures.

Claim 2 is rejected under 35 U.S.C. 102(a) as being clearly anticipated by Benko et al., US 2003/0091466 A1.

Benko et al., teach a means of releasing a fragrance including a card impregnated with a fragrance agent. The card is capable of being cut into strips and of being used with a vacuum cleaner. See the abstract and the figures.

Response to Arguments

Applicant's arguments filed 7/27/2007 have been fully considered but they are not persuasive.

In response to applicant's argument that the instant claim limitations are not met by the prior art of record because the card of claim 2 is cut into strips and bent at its center prior to insertion into the vacuum, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

The Examiner would continue to maintain that the scented cards of each of the prior art references applied are fully capable of being cut into strips and bent at the center. Applicant's arguments fail to distinguish any structural difference required to use any of the cards of the prior art for such a use.

Conclusion

Art Unit: 1744

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
